PRESS RELEASE: FOR IMMEDIATE REEASE:

**10/16/2023 ADDRESS TO THE CITY OF FORT MYERS FLORIDA
CITY COUNCIL**

Ward 4 City Councilman Dr. Liston Bochette has asked me this past fall 2021 to write a set of pamphlets and for the explanation of the forces tearing our City of Fort Myers, Florida and nation apart. This writing is especially difficult as I am challenged by my intellectual disabilities and unique intellectual abilities. I am profoundly honored to do this work and yet I am cast into this role by the natural forces of my life and the government, academic and institutional forces that oppose a natural and citizen inventor in visual art history painting

Because Robert Rauschenberg lived in Lee County the City of Fort Myers, Florida Government was set up in 1979 for the possible appearance of an individual who invented a new form in visual art. It was predicted such an individual would have intellectual disabilities from abilities - as Rauschenberg did.

I was born and developed seeing inside and outside my mind at the same time. My parents had genius IQs of 146 and 147 and did not think I could be educated. I was given an IQ test in Jr. high school that showed I had no measurable intelligence in English and math. One section on abstract reasoning involved predicting shapes from folding or unfolding them and I scored 99 out of 100 correct. A man from the IQ test came to talk to me and told me I was different but that I would be OK.

My high school art teacher talked my father into sending me to an accredited art college. I choose the most mysterious one in the United States.. I was hoping to find the answers I had about my vision that challenges me every second of my life.

I attended the Atlanta College of Art from 1974 - 1978. On the first day we found out we were in a first time four year program from an unknown academia. This academia became unknown again in 1979 until recently when I revealed it's presence here.

There are six elements of perception, the circle , the triangle and the square, the red, the yellow, the blue. We learned to use the six elements of perception and for possibly inventing a new form in painting. I am the only person to do so. Because of my intellectual disabilities I have also shown this to be the most accessible knowledge.

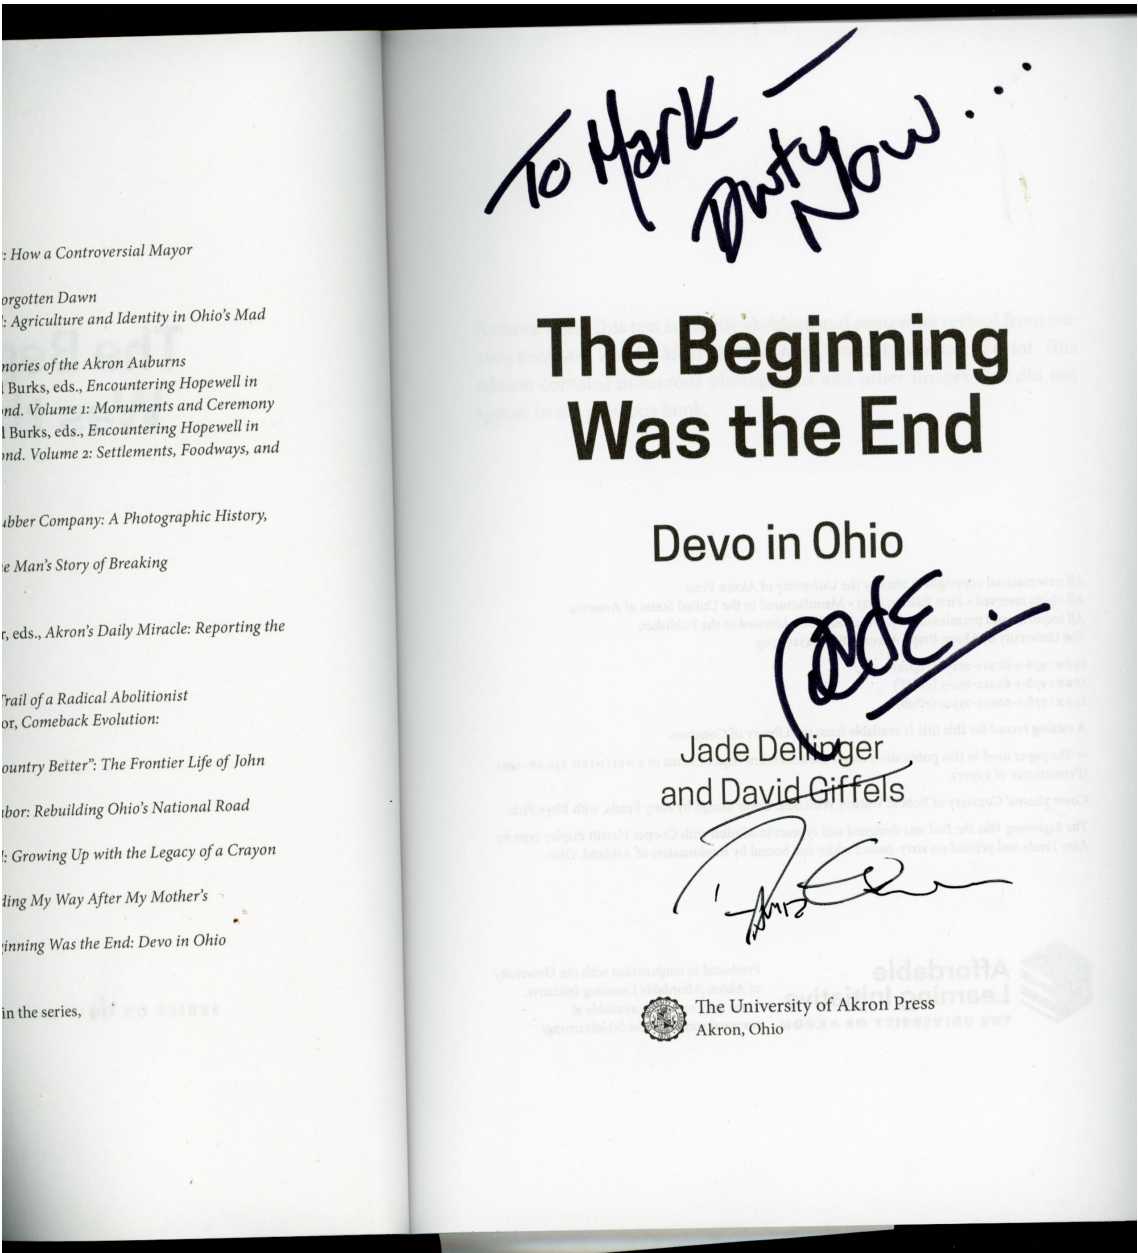

I was born with the ability to visually manipulate shapes in my mind and by chance found the art school based on this ability and for inventing a new form in visual art history. This knowledge is either true or false and that is how I have the ability to assert this knowledge to my City government as sworn affidavits.

From 1979 to 2019 every possible resource including NASA, computers, artificial intelligence and CERN were used when they became available to try and invent a new form in visual art but failed. This program is carried out in the secrecy of academic freedom.

Director Jade Dellinger of the Bob Rauschenberg Gallery is the only individual who can affirm this history. Our City of Fort Myers Government can allow him to do so.

This will free Director Dellinger and the City of Fort Myers, Florida to establish sustainability for human governance and on the eve of artificial intelligence. Director Dellinger is the most unique academic in the USA. There is no greater opportunity and necessity for our future as a democracy than this.

Computer Handicap Recognition and Icon will help Director Dellinger and the City of Fort Myers in establishing our continued human presence in governance and art and science in this most difficult challenge and fast approaching future we face.

To Mark - Best wishes to you Now... Jade
