**October 6, 2025 PRESS RELEASE: FOR IMMEDIATE REESE**

**ADDRESS TO THE CITY OF FORT MYERS FLORIDA  
CITY COUNCIL**

**Ward 4 City Councilman Dr. Liston Bochette asked me in the fall of 2021 to write a set of pamphlets and for the explanation of the forces tearing our City of Fort Myers, Florida and nation apart. This writing is especially difficult as I am challenged by my intellectual disabilities and unique intellectual abilities. I am profoundly honored to do this work and yet I am cast into this role by the natural forces of my life and the government, academic and institutional forces that oppose a natural and citizen inventor in visual art history / painting**

After years of listening to City Attorney Grant Alley read the rules for public comments I realized that there has never been a public offering for the use of the in Chambers media projector and City TV. Use of City TV and media projector should be included with the spoken rules for public comments.

Visual art is visual speech and is protected as free speech in our US Constitution - though not adequately as there is no coherent advocacy for visual speech. This neglect of advocacy enables the intellectual theft of visual art for artificial intelligence. Regardless of intent this exclusion from City TV and computer and AI media violates civil rights.

I question if it is appropriate for the City to exclude public speakers from the use of City TV and media projector -understanding that the issues presented comes under the jurisdiction of the City Council.

The City of Fort Myers uses computer and now AI input for City TV and in-house media display. . How is the citizen to link and broadcast media over City TV and in house media display?

It should be known that no one would understand how to use the media projector and City TV without orientation. It would be assumed all citizens would be given guidance in the production of media as it is a learned skill. There needs to be a City media center for the intellectually capable citizen to create media expressions to participate in City Government through City TV.

The solo speech of the individual citizen without computer equality and equal access of City computer media is absurd.

Equal access to a media production facility and equal access to data used for our governance needs to be established. The citizens require the ability to produce the same quality of media presentation as the City.

With an inclusive media facilitation (including genius, innovation and invention) the process for establishing ownership of content could be established. The ability for the individual to retain copyright could be defined and in relation to artificial intelligence. Civil rights are individual rights.

There needs to be a City media center for the intellectually handicapped to create media expressions to participate in City Government. Since 1979 our culture was designed to prevent the recognition of the potential and reality for innovation and invention in visual art that come from disability. This is one

reason for the non recognition my inventions and genius in visual art history / painting.

Genius, authorship on the chopping block because of the democratization of music and artificial intelligence. We can establish the definition of genius and authorship and protect free speech going forward.

Establishing an AI and media center for citizen City TV and City Council participation could serve as the foundation of open intellectual culture. We were denied an open intellectual culture in part to prevent a citizen equality in City Government participation.

no inclusivity in civi rights if individuals not recognized. AI is also the opposite of inclusion. AI is the inclusion of corporate ownership or part ownership of your content. Rules of AI content ownership shift and change without civil rights. Understanding copyright and AI is college level intelligence - and is an ongoing college level intelligence onward as AI re boots itself in ever tightening time periods.

September 8 - 12, 2025 The City of Fort Myers, Florida celebrated Disability Voting Rights Week . Now we need City TV and Computer Disability Participation - every day - through new

CIVIL RIGHTS

FORT REPORT NEWSLETTER

October Edition

MAYORAL MINUTE

Dear Neighbors,

With October underway, I want to reflect on the recognition and community engagement we shared last month. At City Council Meetings and special events, I presented proclamations for Hispanic Heritage Month, Constitution Day, Diaper Need Awareness Week, Disability Voting Rights Week, Welcome Week, and for DHOP Day, recognizing 20 years of the beloved Downtown Fort Myers pizza staple.
